## EXPERIENCE

### Tasttlig Corporation

*Software Developer*

Toronto, ON

February 2021 - Present

- Addressed regular production bugs and improvements in existing codebase using Kanban to organize and prioritize requirements.
- Designed and implemented new features from the ground up starting with UI/UX mockups in Adobe XD, to complete integration full stack in React, and React Native.

### Freelancing

*Brand Development, Web Development, Design & Audio Engineering*

Toronto, ON

April 2014 - Present

- Developed a brand and presence online in order to find new clients around the world.
- Challenged myself with new technologies and concepts while doing paid work for clients allowed for opportunities to learn very quickly while gaining experience.

### Best Buy

*Connected Solutions Advisor*

Toronto, ON

May 2019 - October 2020

- Exercised strong communication, sales, and collaboration skills to provide prompt and engaging service to customers.

### Precision Landscaping

*Web Designer & Developer*

Toronto, ON

May 2014 - August 2018

- Designed, developed and maintained the entire website, flyer, and decals for trucks.

## PROJECTS

---

**bookends** *JavaScript, React, Bootstrap, Express, PostgreSQL, Sketch (UI/UX)*

<https://github.com/dimontejulia/bookends>

React based book tracking application with social components allowing the user to organize books they've read and stay curious about books they might read in the future.

**scheduler** *JavaScript, React, Sass, Express, PostgreSQL, Storybook, Cypress, Jest, Heroku, CircleCI*

<https://github.com/dlinardi/scheduler>

An interview scheduler application where the user can book and manage an interview with an instructor. Built as a single page application using test driven development methods.

**Tasttlig Mobile Application** *React Native, JavaScript, CSS, PostgreSQL, Express, UI Kitten, Adobe XD*

<https://apps.apple.com/ca/app/tasttlig/id1571516462>

I lead a small team of 3 people in building and deploying a complete mobile application that coincides with the company's web application, with 0 prior experience in mobile development/React Native.
